

Sk Mohammed Mamoon Mondal

Product Manager

Bengaluru, India | +91 7022382627 | sheikh.mamoon.mondal@gmail.com | [LinkedIn](#) | [Portfolio](#)

Founding PM with 4+ years building AI-native products. Run a PLG self-serve product and an enterprise B2B AI agent in parallel, owning 0-to-1 discovery, agent design, and eval-driven reliability, while using AI internally to scale PM throughput.

PROFESSIONAL EXPERIENCE

Supanote.ai

01/2026 - present | Bengaluru, India

Founding Product Manager

- Lifted PLG paid conversion 5% in 2 months on the AI clinical scribe through funnel analysis, onboarding iteration, and reliability improvements, running PLG and enterprise B2B in parallel.
- Cut the AI scribe's production incident rate from 3.5% to under 1% in 2 weeks via architectural audits and a custom eval harness, ending note creation failures that were losing therapists' notes.
- Launched a 0-to-1 enterprise AI agent that automates insurance benefits verification for US behavioral health clinics, scaling it to 2.2x ARR in 3 months.
- Drove a 90% reduction in user workflow turnaround time by re-architecting rule-based automation into an agentic orchestration harness with parallel LLM agents, tool calling, and context and memory loops, gating each step on F1 and rubric evals with HITL fallbacks.
- Built the founding Product operating layer, analytics, agile cadence, and internal AI agents automating program and design ops, driving a 5x lift in product velocity.

Innovaccer

07/2022 - 12/2025 | Noida, India

Product Manager

- Automated fax-based referral intake for specialty clinics with an AI agent, improving per-user operational efficiency 4x and cutting turnaround time 40%.
- Scaled adoption of an automation platform 75% in 3 quarters by segmenting users, uncovering key pain points, and shipping bi-weekly experiments guided by KPIs.
- Improved complex UI flows via user-journey analytics and A/B testing, lifting active engagement 35%.
- Scaled automation execution capacity 2x through demand forecasting and rapid cross-functional delivery, maintaining under 1% error rate under higher operational load.
- Unified post-acquisition product integrations into a single UX, achieving 100% SLA adherence and under 2% incident rate post-launch.
- Built a contract-driven integration layer replacing one-off API and Kafka hooks, saving redundant engineering effort and cutting rollout time by 67%.

EDUCATION

Indian Institute of Technology (IIT) Dhanbad

2018 - 2022

Bachelor of Technology (B.Tech), Mechanical Engineering | CGPA: 8.28

SKILLS

Product: Discovery, strategy, roadmapping, prioritization, GTM, evaluation frameworks, A/B testing, KPI trees, telemetry.

AI and Agents: LLMs (Claude, OpenAI, Gemini), agent design (harnesses, tool calling, skill hierarchies, context and memory, HITL, guardrails), RAG, evals, MCP.

AI Foundations (self-directed): Post-training methods (SFT, RLHF, DPO), reasoning models, transformer internals.

Data and Tools: Claude Code, Codex, Claude Design, Claude Cowork, SQL, Python, Mixpanel, Posthog, Linear, Figma, Git, n8n, Cursor, Braintrust, Langfuse.

ACHIEVEMENTS AND INTERESTS

Launched an AI agent featured in industry publication [Fierce Healthcare](#).

Interests: Fitness, cricket, swimming, and exploring nature.
